

GLASS TILE CARE & MAINTENANCE

Post Installation Cleaning

Do not attempt to clean new installations for a minimum of 24 hours after completing the grouting process. After 24 hours remove loose dirt by vacuuming or sweeping. Follow directions and prepare a cleaning solution using warm water and a neutral ph cleaner such as Miracle Sealants Mira Clean #1 (read and follow all manufacturer's instructions). These types of cleaners are available from Stone tile. Thoroughly clean the glass tile, including grout joints, using a nylon scrub brush or nylon scrub pad following manufacturer's directions. Rinse thoroughly with clean warm water and allow to dry. A second rinsing may be required to completely remove all traces of the cleaning solution.

Regular Maintenance

Prepare a cleaning solution using warm water and a neutral ph cleaner specifically designed for cleaning glass tile such as Miracle Sealants Mira Clean #1 (read and follow all manufacturer's instructions).

Thoroughly clean the glass tile, including grout joints.

Using a nylon scrub brush or nylon scrub pad following the manufacturer's directions.

Rinse thoroughly with clean, warm water and allow glass tiles to dry.

A second rinsing may be needed to completely.

Remove the cleaning solution.

Heavy Duty Maintenance

The following method of maintenance should be used for installations with cement based grout or setting material haze that require a stronger cleaning solution.

Grout must be cured for a minimum of 14 days. Wait 14 days after the grout has been installed then use a sulfamic acid or organic based cleaner such as Miracle Heavy Duty Acid Cleaner .

Follow the manufacturer's directions using a nylon scrub brush or nylon scrub pad. Apply the solution allowing it to penetrate for 3-5 minutes followed by re-applying and scrubbing.

Rinse thoroughly with clean, warm water and allow to dry.

A second rinsing may be needed to completely remove the cleaning solution.
